Clinical traineeship on Clinical Psychology

. **TRAINEESHIP - "PROFESSIONAL IMPROVEMENT PROGRAM IN CLINICAL HOSPITAL PSYCHOLOGY (Clinical Psychology Applied to Hospital)" at**

Instituto de Infectologia “Emílio Ribas” (Emílio Ribas Infectology Institute) - (www.emilioribas.sp.gov.br/)

Period: from March 1995 to February 1996.

Total number of hours: 1,896 (25 hours per week of compulsory practical experience, total of 1200 hours of compulsory practical experience, 356 hours of face-to-face supervision and 340 hours of the scientific-theoretical program)

Type of institution: It is a public hospital of the State Health Department of São Paulo specialized in clients with infectious diseases, mainly people with AIDS.

Title of major research and monograph: The work of a psychologist in the infirmary ward: the experience at “Emílio Ribas” Infectology Institute. (about 45.000 words).

Main activities and responsibilities: At the DAY-HOSPITAL and INPATIENT units, psychological assessment techniques and intervention practice with the application of the theory of psychotherapy and counseling (individual/ group, long term/ short term psychotherapy and counseling practice) with adults, children and adolescents with HIV/AIDS and mental disorders/emotional problems in the infirmary ward, outpatient and day hospital of the institution. I was trained in a multidisciplinary team composed of doctors, nurses, psychologists, physiotherapists, among others. Besides, as part of my tasks in this program, I developed the qualitative research “The work of psychologists in the infirmary ward: the practice at the Emílio Ribas Institute of Infectious Diseases”, which studied the clinical role of psychologists at this institution and was presented in a scientific meeting. All the traineeship practice was supervised face-to-face in weekly sessions by Heloísa Helena de Araújo Campos (clinical psychologist).
